22. (Currently Amended) ~~A container arrangement (1)~~ The dental kit according to claim ~~25~~ 24, characterized in that the retaining device (1) and the containers (5, 5') are designed such that the retaining device (1) accommodates the containers (5, 5') in a form-fitting manner.

23. Cancelled

24. (Currently Amended) ~~A container arrangement (1)~~ The dental kit according to claim ~~25~~ 24 wherein a first container (5) is filled with a material for restorative dental work which is only to be used once another material, which is contained in the second container (5'), has been used.

25. (New) A dental kit for delivering material for dental restorative work comprising  
material for dental restorative work,  
at least two containers (5, 5'), and  
a container restraining device (1)

where the material for dental restorative work is contained in at least a first container (5),  
where the first container (5) is arranged in the container restraining device (1) along with  
at least one additional container (5') such that the containers can only be removed from  
the container restraining device in a predetermined sequence.

26. (New) A method of assuring a predetermined treatment and/or mixing sequencing comprising the step of providing at least two containers (5, 5') which are kept in a retaining device (1) in a defined removal sequence.

27. (New) A method of assuring a predetermined treatment and/or mixing sequencing in dental restoration work comprising the step of providing a dental kit according to claim 25.
